Traditional Call Centers are
Outdated, Overwhelmed, and
Costly.

The current call center experience is inefficient

Customer places call to your Customer Care Line

Call center congestion

Costly Human Resources

Long Wait Times

Lack of adequate context

Customers are spending precious time to
get their problems resolved

7.30 mins

Average Call Wait time

Our average wait time trying to reach out to the
Customer Care Hotline for Telcos & Banks

An opportunity exists to transform the customer experience by providing **fast, personalized, and automated** support without sacrificing the personal touch.

The call center experience can be better.

Swift Assistance

Customers should receive responses quickly, minimizing any waiting.

Personalized User Experience

Customers should experience conversations tailored to their unique needs

24/7 Availability

Customers should be able to access help whenever they need it.

Seamless Escalation

Customers should be smoothly transferred to a human agent for complex issues, without repeating information.

An Ideal call center experience could look like this

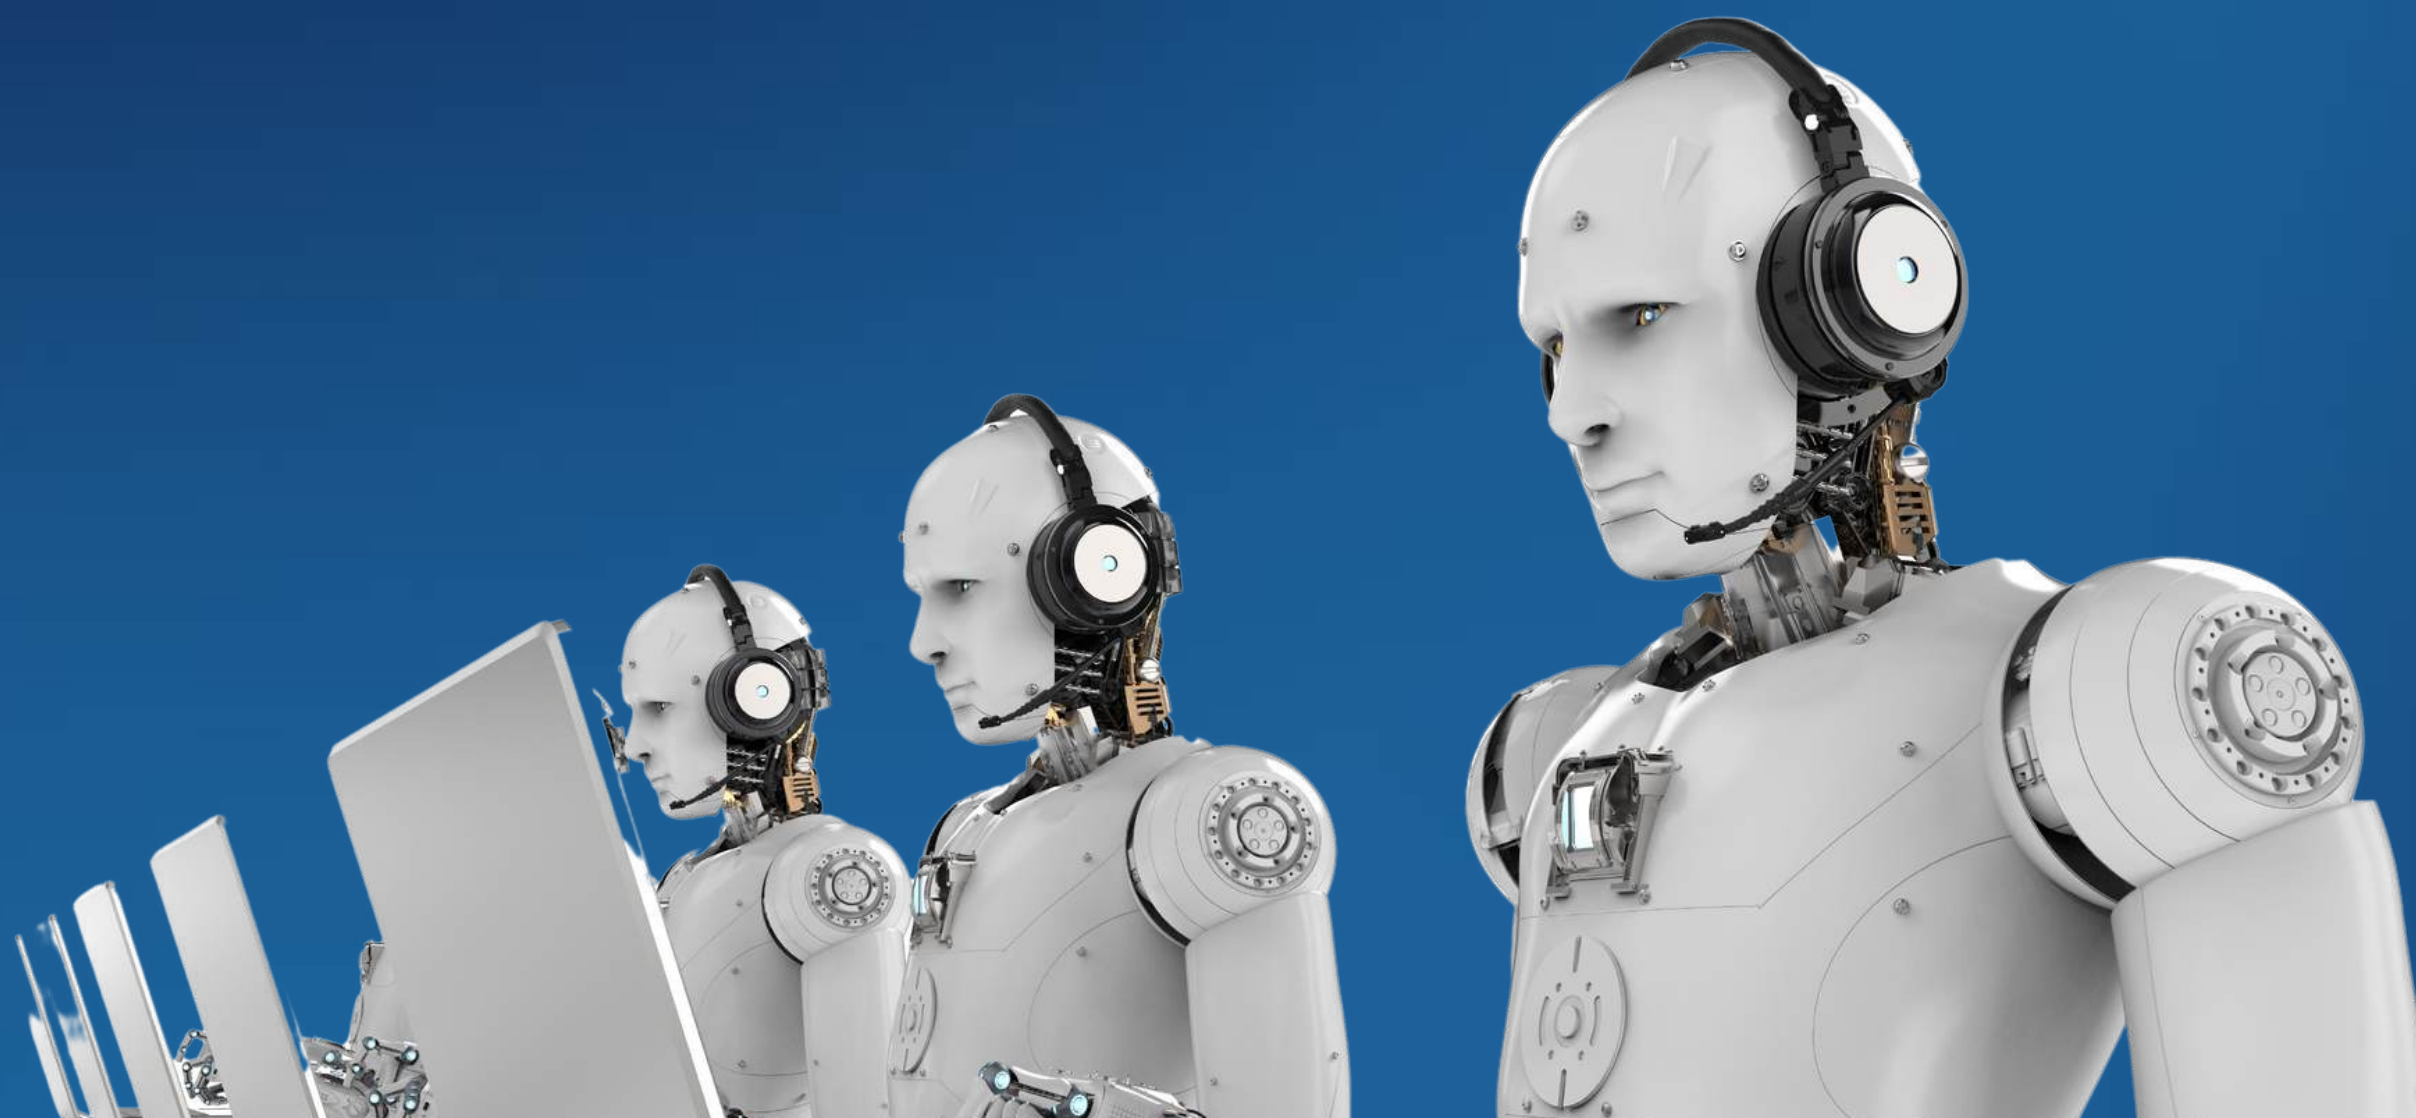

A.I Agents can provide intelligent
automation to the call center
process

Amira brings over 80% Efficiency to your call center

Your Business has the potential to save over 80% in the Customer Experience process.

1

Increase Dispute Resolution and Revenue generation through personalized campaigns

2

Reduces costly human resource and infrastructure required.

3

Reduces call wait time due to Complexity of traditional IVR systems

Amira is built to help you automate your customer service experience

Capabilities

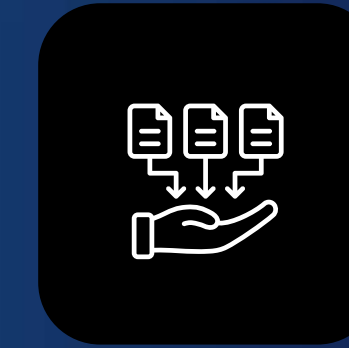

Fully Customizable Agents

You have the option to personalize your agents according to language, gender, voice, and persona. Amira can embody warmth, humor, or a highly corporate demeanor – the choice is yours.

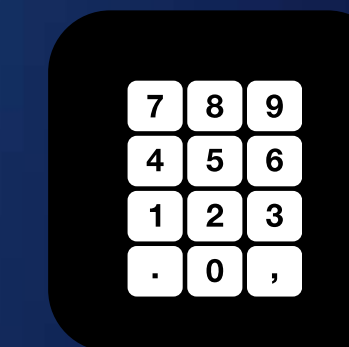

Call Forwarding

Amira is designed to assist you, not to take your place. She can redirect calls to a designated number of your choosing, ensuring that your customers still receive a personal touch in their experience.

Data Capturing Capabilities

Amira is able to gather vital information from your calls, like additional details needed from a caller such as a suitable demo date, customer information, or messages.

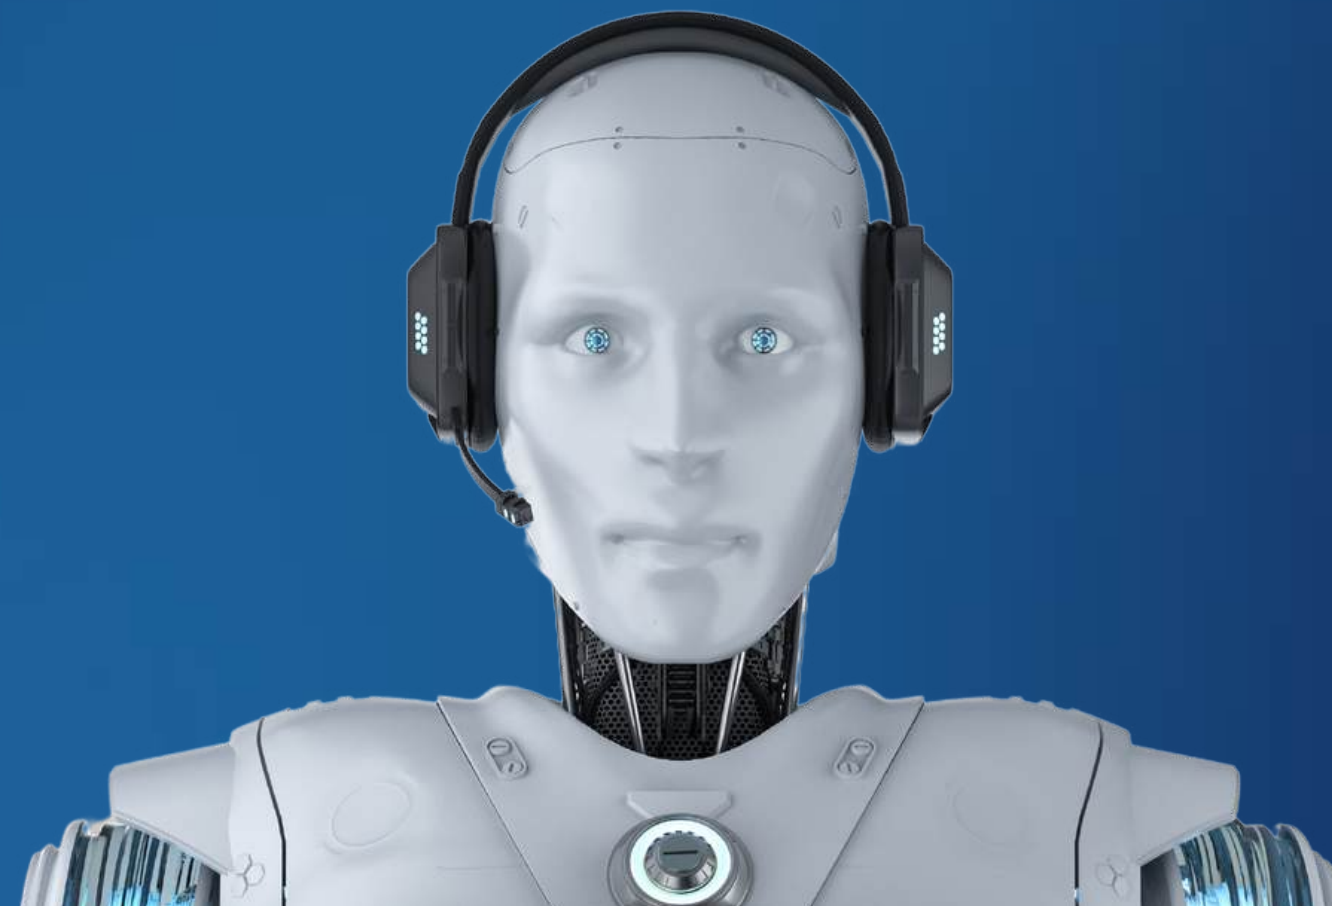

Custom Phone Numbers.

Amira can offer you a dedicated International Phone number that can handle both incoming and outgoing calls. Currently, we provide numbers in the USA, Canada, and Nigeria.

One Solution, Endless Possibilities

Amira does the work of 1000
customer care agents.

Amira can be used for various processes

Reactivate Dormant Accounts
